

Lead Wheel Weight Update

2010 California Lead Wheel Weight Ban Update For Immediate release: 09-21-09

As many of you know, under upcoming California SB757 it will be illegal to purchase, sell, or distribute lead wheel weights in the State of California beginning January 1, 2010. K&L Supply is responding by expanding our line of steel wheel weights. We will be offering steel stick-on weights in 5 and 7 gram increments, with silver, black, and CHROME finishes available. These stick-on weights will be sold in boxes for shop use, and skin carded with 3 strips for over the counter sales. In addition to the stick-on style weights mentioned, we are also expanding our line of O.E.M type clip weights. An unexpected benefit of this transition is that steel weights will cost considerably less than the lead weights they are replacing. Call with any questions on our weights, we'll be glad to help.
